

Executive Steering Committee Elections 2026

Nominee Name: Kevin Webb

Current Position/Title: President & Chief Operating Officer

BioMaP-Consortium Member Organization: API Innovation Center

ESC Seat Applying for: Voice of Membership (i.e., Member-At-Large)

Please describe how your background, training, and experience would support your ability to serve in a governance role on the Executive Steering Committee.

With more than 25 years of leadership experience spanning pharmaceutical manufacturing, healthcare, government affairs, and public-private partnerships, I bring a unique combination of industry expertise, strategic governance, and stakeholder collaboration that aligns well with the Executive Steering Committee's mission. As Co-founder, President, and Chief Operating Officer of the API Innovation Center (APIIC), I have led national initiatives to strengthen domestic pharmaceutical manufacturing, secured nearly \$60 million in federal and state funding, and worked closely with ASPR, Congress, federal agencies, manufacturers, health systems, and academic partners to advance supply chain resilience and preparedness. My previous leadership roles at Mallinckrodt Pharmaceuticals and Sanofi Pasteur provided extensive experience in commercial strategy, regulatory and legislative advocacy, coalition building, and aligning industry priorities with public policy objectives. These experiences have prepared me to provide balanced, collaborative governance, help establish strategic priorities, and represent the pharmaceutical industry's perspective while fostering productive partnerships between ASPR, BioMaP-Consortium members, and other key stakeholders.

Please describe the relevant experience, expertise, and perspective you would bring to the ESC seat you selected.

I would bring a combination of executive leadership, pharmaceutical industry expertise, and practical experience building collaborative public-private partnerships to advance national pharmaceutical manufacturing and supply chain resilience. As Co-founder, President, and Chief Operating Officer of the API Innovation Center (APIIC), I have worked across the pharmaceutical ecosystem-including manufacturers, healthcare providers, federal and state agencies, academic institutions, and policymakers-to develop strategies that strengthen domestic production of critical medicines and improve long-term supply chain security. My background in commercial leadership, government affairs, and strategic planning at Mallinckrodt Pharmaceuticals and Sanofi Pasteur enables me to understand the operational, regulatory, and business challenges facing industry while

identifying opportunities for collaboration with government partners. I would bring a balanced, solutions-oriented perspective to the Executive Steering Committee.
