

Executive Steering Committee Elections 2026

Nominee Name: Christine Yore

Current Position/Title: Vice President, Enterprise Solutions

BioMaP-Consortium Member Organization: Ecolab Life Sciences

ESC Seat Applying for: Voice of Membership (i.e., Member-At-Large)

Please describe how your background, training, and experience would support your ability to serve in a governance role on the Executive Steering Committee.

Throughout my 25+ year career in the pharmaceutical, biotechnology, medical device, and healthcare sectors, I have held executive leadership roles requiring strategic planning, cross-functional decision-making, stakeholder alignment, and organizational governance. As Vice President of Enterprise Corporate Accounts for Ecolab Life Sciences, I lead a global team serving many of the world's largest pharmaceutical manufacturers and work across commercial, technical, marketing, finance, and operational functions to drive strategic outcomes.

I have extensive experience leading business transformation initiatives, acquisition integrations, strategic partnerships, and global growth programs. My roles have included participation on executive leadership teams, leadership of cross-functional steering committees, and development of enterprise strategies that balance diverse stakeholder interests while advancing long-term organizational objectives.

Throughout my career, I have collaborated across the biopharmaceutical ecosystem with manufacturers, suppliers, technology partners, and industry stakeholders to address shared challenges and opportunities. I believe strong governance, transparency, and collaboration are essential to advancing innovation, strengthening supply chain resilience, and supporting the continued growth of the life sciences industry.

I believe this combination of executive leadership experience, industry expertise, and ability to lead complex, multi-stakeholder initiatives would enable me to make meaningful contributions to the BioMaP Executive Steering Committee and help advance the consortium's strategic priorities.

Please describe the relevant experience, expertise, and perspective you would bring to the ESC seat you selected.

In my current role as Vice President of Enterprise Corporate Accounts for Ecolab Life Sciences, I work closely with many of the world's leading biopharmaceutical companies to understand their priorities, identify common challenges, and build alignment around

shared objectives. This experience provides me with direct insight into the perspectives, needs, and concerns of companies across the biopharmaceutical manufacturing ecosystem.

Throughout my career, I have built trusted relationships across pharmaceutical manufacturers, biotechnology companies, suppliers, technology partners, and government stakeholders. My leadership roles have consistently required active listening, transparent communication, and consensus-building, ensuring stakeholder feedback is heard, understood, and translated into meaningful action.

As the Voice of Membership representative, I would work to strengthen member engagement, facilitate open communication between consortium members, ATI, and government stakeholders, and ensure member perspectives help shape BioMaP's priorities and activities. I would be committed to fostering a collaborative, responsive, and member-driven consortium that advances the interests of the broader biopharmaceutical manufacturing community.
